

JustListedFlyers "Farm Postcard Program"

Farming for new buyers and sellers of real estate is easy with our new line of proven farming postcards. Just like a farmer plants seeds in his field and waits until they grow so he can harvest the crop, real estate farming works the same way. Your seeds are regular postcard mailings to a specific area. The more you mail, the more people in the area will recognize and remember your name.

Here's How Our Program Works...We will design and print postcard "Masters" with a common front side which we inventory in our warehouse. Each month we will print a new market report or special message provided from the agent on the reverse side of the postcard and mail to all your current and potential clients on your farm list.
